About us...

Progress Point is an institute of enthusiasts who has developed a research based educational program created after surveys & psychological analysis. This program is for every student who would be the foundation stone in building the nation. We have categorized ninety problems after doing extensive survey research and analyzing on every parameter, which is evidently present for every aspiring student for any competition. These ninety problems are the root cause for not achieving the success/desired goal.

This program will make every student passionate about studies and its positive outcome. We provide thirteen students skill development program which will help every student to excel in their studies.

In this fast changing society and the current perspective of the social warp and weft personality development is an essential ingredient of every student which when enhanced will change the future course of the nation. Analyzing this need of the hour progress point has also developed a personality development program.

We take pride by updating you all that we provide online and offline classes by countries best and experienced faculties. We also intend to organize exhaustive and enthusiastic seminars, programs for aimless and target-less students. These seminars and programs will certainly build self confidence-self-esteem-devotion, dedication and positive attitude for their life and career.

To the surprise of parents we hereby gladly announce that we have developed a kid-learning-kit-program for every age group (2-8+ age group children). Which will help them to attain positive attitude, positive thinking, good habits, mental and physical growth.

The research shows kids' fascination towards electronic gadgets, which becomes sometimes addiction to them. Our program will help every family and child towards the sustainable use of electronic gadgets.

Its an old aphorism that health is wealth and keeping in view of this Progress Point has developed a program of sports, health and fitness program which will enhance the strength, endurance and flexibility, co-ordination, speed and balance of body of children that is the most important components of healthy and fit body.

All above-mentioned programs are the outcome of exhaustive and extensive research and are delivered by excellent skill full skilled faculty who keeps on updating by experts time to time.

We are also providing 24/7 student's helpline numbers for their any problems, query, distress, etc. this is happening first time ever in India which will help to decrease the suicidal rate in India.

We will be the career coach of every student's life guiding him or her to a successful and bright career which will in-turn make themselves respond

Chairperson Message

Sanjeev Kumar Mathur
Chairman/Founder

From ancient times to the modern era education has been of exemplary importance for the foundation of the human race. Many intellectuals, scholars, learned persons, etc have explained the importance of education and defined it in their own variegated manner.

*But in my opinion, the real essence and meaning of education are, **“Education is an important process through which we can convert diverse situations in our favour establishing harmony by attaining Knowledge and experience. It also makes us capable of giving our contribution in the political & socio-economic development of the family, society and the Nation”.***

Education provides humans credence, confidence, valour, power and positive energy in order to make humans a socio-responsible being who can contribute to the progress of the nation by conserving his/her sacraments, culture and civilization. Education helps to capitulate mind feebleness and its weakness. On the other hand, it gives strength to attain another level of entirety. Education replaces demerits of humans by other eminent spanning qualities, giving meaning to his/her genesis. It is the education by which the human race has advanced from cave-dwelling to moon, mars & other planets.

Education doesn't mean attaining degrees and certificates but it is a continuous learning process of attaining knowledge since his/her birth till his/her death.

Our aim is to contribute in nation-building by eradicating the problems sprouting up in the field of education.

SK Mathur

PROGRESS POINT

Skill Development Program

This program is for those students who are involved in the process of education. Any Student studying in any class above 6th grade can enhance their abilities by learning these skills. There are 13 types of skills, which are necessary for every student, and in the absence of these skills, students are not able to do their studies properly and even after taking good marks, qualities like confidence, patience, hard work, positivity, success, will do not develop in them. This program is very important

for students, children and individuals of all age groups who are associated in some way or the other in the field of education. We have developed these 13 skills by extensive studies.

- This program develops the 13 skills of the students and makes them talented.
- This program develops the spirit of self-confidence in the student.
- This program makes the student to be disciplined and hardworking.
- This program converts student's hard work into success.

Seminar

Our seminar program is for those students and people who are facing unemployment even after completing their education. They do not even know what to do next, how to do it and this develop in competence in them. Today many students are forced to kill their time in their homes even after getting higher education. This is a successful effort for those people, we give right directions to them. Through this program, such students themselves identify their abilities, make good use of their time and achieve their destinations by not giving up and prepare their life successful by learning these skills. This program builds their confidence and lighten up the lamp of their positive thinking.

- *This program helps in identifying the skills.*
- *This program guides you to get success.*
- *This program teaches you to move forward by assessing your mistakes and shortcomings.*
- *The program helps you to succeed in your life.*

Offline & Online Classes

Our organisation conduct online as well as offline classes, which are based on modern technology. We coach for competitive examinations continuously since 2009. Now we have started conducting online classes also. We are also organizing academic classes for the students of all class along with competitive examinations. We have a large team of experienced scholars from India who prepare for various exams. Online classes are organized in two ways, first through Live class and second through Recorded classes. Our organization also provides updated notes and some online tools to every student which are beneficial for the students.

- These classes are given by experts so that the student develops the better and deep understanding. These classes are given by experienced teachers. These classes develop the concept based on the thought ideology.*
- These classes bring success to the student. These classes present solutions based on the personal problems of the students.*

Kiddle Learning Kit

KID'S LEARNING KIT: Now a days small children are very busy through phone, TV, social media which harm their mental ability and learning abilities. Gradually, children has less interest towards education and they like to give their time to these things more than studies. Our organization has created these kits to increase the learning abilities and creating interest in education so that the children freely learn the basic concepts in a playful manner. These kits are meant for children of the age group two to eight years, through which every age group of children can increase their intelligence abilities by learning skills.

- This kit develops knowledge in children through play way method.
- It helps in the mental development of the children.
- This kit develops the interest of acquiring knowledge in children.
- This kit develops good habits reasoning ability in the children.

AGE 2+

AGE 4+

AGE 6+

AGE 8+

Fitness & Sports Program

Now a days children are becoming very languorous and sleepy because their involvement in physical activities are becoming very low. Through this program, we organize a sports and physical education classes for the children of all age groups. Our experienced coaches inculcate the value of healthy Lifestyle, healthy eating habits and healthy thinking in children through sports. Along with the physical development of the children, their mental development also takes place. Children know their physical abilities, a sense of action and reaction in the group is built in them. Good habits are born in children, which enhance their personality. Through this program, children develop wonderful qualities like strength, endurance, mobility, flexibility, balance and coordination.

- This program develops enthusiasm, discipline and team spirit in the children.
- This program keeps the children physically healthy. And emphasizes to learn in a playful manner.
- This program inculcates the spirit of competition, success, and integrity in the children.
